

Student Name: _____

Dear Student/Family:

By now, you've received the list of *recommended* vaccines and important medical and permission forms. The forms are due, now, if you have not already returned them.

The purpose of this letter is to provide a health insurance recommendation, a short medical history form, and a compact vaccine record booklet for international travel. The attached documents (medical form and booklet) will be carried by each traveler, during our trip. We felt that it would be important for our travelers to have this information on their person in the very unlikely event that he/she becomes separated from our group.

1. It is recommended that you contact your family's health insurance carrier to alert them of your trip to China. Please ask what coverage applies and if there is any "in country" contact information that you or your student should have on hand. Record this information on the back of the short medical history form.

___ **Due date: December 21, 2009**

2. The short English/Chinese medical form should be filled out, completely. Certain information will be translated into Chinese, so please PRINT legibly.

___ **Due date: December 21, 2009**

3. The booklet does not need to list every vaccine received since birth. Rather, should you choose to inoculate yourself, or your student, against H1N1, we would like it recorded in this booklet. As a safeguard, you may also list any pertinent data with regard to medical issues.

___ **Due date: February 22, 2010**

If you have any questions regarding the above, please don't hesitate to contact us.
